Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Koura (US Pat. No 6,490,016).

Regarding claims 1-3, the applicant is advised that claims have been given their broadest reasonable interpretation. In re Pearson, 181 USPQ 641 (CCPA 1974), Koura discloses an assembling frame for back light modules for assembling and anchoring a reflector (2, fig. 1), a light guide panel (22), a plurality of optical films (23) and a lampshade (2), the lampshade being located on one side of the assembling frame (fig. 1), and the reflector, the light guide panel, and the optical films being mounted onto the assembling frame in this order, the assembling frame comprising at least: a frame (25) edge having a selected height to hold the reflector (fig. 1), the light guide panel, and the optical films, a plurality of support blades (leaf spring structure is part of the frame) extended inwards (11, 1a fig. 2, leaf spring) from the bottom of the frame edge to hold the reflector, the light guide panel, and the optical films (fig. 1), and a plurality of latch

Art Unit: 2875

blades located on the frame edge on other side opposing the lampshade and extended horizontally being flexible to latch the top side of the light guide panel (figs 1-2, col. 5, lines 49-65), wherein the latch blades are suspended on the frame edge and above a carved space, and have flexibility (see fig 2, Leaf Spring structure), the latch blades are extended inwards from the frame edge to form a bucking block to press a lateral side of the light guide panel (fig. 3).

Allowable Subject Matter

Claims 4-9 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or suggest an assembly frame for a backlight module having all the features of the claim 4 particularly, a plurality of flaps suspended on the frame edge abutting the top surface of two sides of the lampshade to latch the top side of the light guide panel to confine the light guide panel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Saito et al (US Pat. No 6,839,100), Yu et al (US Pat No. 6,820,992), Ogo et al (US Pat. No 6,533,428), Nakayama (US Pat. No 6,201,586),

Kitagawa (US Pat. No 6,339,418), Sun et al (US 2002/0041482), and Chen (US 2002/0093811) all are cited of interest.
